- Students have articulate and reasoned conversations with their teachers, which accelerates their learning. Students' attitudes to their studies are very positive and result in their very strong progress.
- Students' enjoyment and commitment to their studies are evident in their excellent attendance
- Students have a mature approach and take responsibility for ensuring they make the most of their study out of lessons as well as in class. Teachers help students to be precise in their understanding of how well they are doing and exactly where they need to focus their efforts.
