

Think about some businesses in your local area of Huntington, Strensall etc.

- What products/services do they provide & why?
- Are they large or small?
- How many staff do you think they employ?
- Are they local or do they operate nationally/internationally?
- Who are their competitors?
- Who are their customers?
- Where might they get their resources from?
- What are logistics (road and other transport) like in the local area?
- How well do you think they are doing at the minute? How do you know?
